

MURDER BY GOVERNMENT: THE NEED FOR GENOCIDE EDUCATION

Join the Center for Holocaust and Genocide Studies and Representative Paul Tucker as we honor Paul Rabchenuk, Esq., for his commitment to education about the Ukrainian Famine or Holodomor (1932-33) and his advocacy of early genocide education.

Rabchenuk will discuss comparative genocide of the 20th century with the aim of finding common threads which allowed the murder of millions of victims by the policies of tyrannical governments.

These revelations point to the need for early public education so that awareness can serve as a diminishing force and an informed public can insist on the final eradication of these despotic acts.
